

Iksanika Extends its Offer to Online Service and Software-as-a-Service (SaaS) Providers

Iksanika, a high-end US outsourced software development company with production office in Belarus, has announced today its offer to B2B and B2C online service and software-as-a-service (SaaS) providers.

Iksanika addresses its offer to web-service providers and SaaS vendors dealing in a wide range of industries - [Travel and Entertainment](#), [Resort and Hospitality](#), Online Stores, E-Commerce, [Finance and Banking](#), Rental, Leasing and many others. Iksanika has been successful working with the clients from Europe and the U.S. since 2000. It tailors custom solutions to clients' specific needs and requirements thus empowering them with a strong competitive advantage.

"People buy, sell, communicate, check their banking accounts, book tickets and do all kind of things that used to require personal presence, online. Small, middle-sized enterprises and large scale companies base their internal and external business processes on web-solutions. No wonder that demand on e-commerce and online solutions is constantly growing", - said Alex Vergej, CEO of Iksanika. - "In response to the demand for high-quality software and next generation of web based on SaaS, Clouding and RIA, we are glad to offer time- and cost-effective service solutions for companies looking to optimize or customize their business processes. We realize that online applications require a unique combination of security, functionality and usability. Iksanika has a solid track record of successful projects in this market segment. And we are ready to contribute our expertise and experience to enhancement of our clients' effectiveness. We do better then you expect".

Outsourced software development services delivered by the company range from simple web-based applications to complex systems. Qualified Iksanika engineers provide seamless integration of web front end with back office applications or external tools. Applications powered by Iksanika have proved to serve millions of consumers worldwide.

"Iksanika's innovative approaches as well as our experience of cooperation with SMB companies and cost advantages make the company a good choice for customers looking for quality and affordable price combined. We do not only provide solutions for businesses, but also ensure personal attitude to people on client's side. Iksanika professional managers guarantee full project transparency and high level of communication both at development and post-production support stages", - added Alex Vergej.

About Iksanika:

[Iksanika](#) delivers [outsourced software development](#) and [custom software development services](#) to leading software development and SaaS, e-Commerce and Rich Internet Application (RIA) providers worldwide. Iksanika's main focus is web-based solutions, and offer [full-cycle software development](#), [re-engineering](#), [QA](#) and [maintenance](#) services. Certified by independent assessors (Carnegie Mellon University) and technology vendors (Adobe and Sun Microsystems), the company provides technological support to their customer's business success by reducing time- and cost-to-market, along with enhancing functionality and usability of their customer's software solutions.
