

Iksanika Re-enforces Cooperation with Software Products Vendors

Iksanika, a high-end US-based [software development company](#) with R&D center in Belarus, has announced today the extension of its vertical practice by offering [outsourced software development to Software Products Vendors](#).

Over the last 9+ years Iksanika has been focusing on technological support of companies seeking for time- and cost-effective services. Its strong outsourcing software development process is based on clear communication, high response, quality and development management processes. Company engineers have a profound expertise in a wide variety of tools and technologies with the main focus on Java, .NET and [RIA](#) (Adobe Flash/Flex + Microsoft Silverlight), C/C++/C#. Today Iksanika offers full-cycle [software product development](#) and [quality assurance](#), as well as [maintenance](#), [re-engineering](#), performance tuning and integration with external systems to the most business-intensive industries in the USA and Europe.

"Software development outsourcing is a traditional practice of large vendors today. But the most common fears that companies face are the uncertainty in software quality and communication problems between geographically dispersed parties. Iksanika's services comply with international standards and requirements applicable to software development, quality control and management process. We are certified by independent assessors (Carnegie Mellon University) and technology vendors (Adobe and Sun Microsystems), that proves the excellence of Iksanika technology professionals and software services quality", - said Alex Vergej, CEO of Iksanika. - "We are also dedicated to client-oriented approach and ensure high level of communication both at development and at post-production stages that eliminates the risk of different expectations".

Iksanika encourages software products vendors to take advantage of realizing their objectives with the help of external resources. Company turnkey solutions developed exactly according to customer's requirements enable vendors to reduce the time- and cost-to-market.

About Iksanika:

[Iksanika](#) delivers [outsourced software development](#) and [custom software development services](#) to leading software development and SaaS, e-Commerce and [Rich Internet Application](#) (RIA) providers worldwide. Iksanika's main focus is web-based solutions, and offer [full-cycle software development](#), [re-engineering](#), [QA](#) and [maintenance](#) services. Certified by independent assessors (Carnegie Mellon University) and technology vendors (Adobe and Sun Microsystems), the company provides technological support to their customer's business success by reducing time- and cost-to-market, along with enhancing functionality and usability of their customer's software solutions.
